Paper No(s)/Mail Date 6)							

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-3, drawn to an ozone generator, classified in class 422, subclass

186.07.

II. Claims 4-11, drawn to an ozone generator, classified in class 422, subclass

186.07.

III. Claims 12-16, drawn to an ozone generator, classified in class 422, subclass

186.07.

IV. Claims 17-23, drawn to an ozone generator, classified in class 422, subclass

186.07.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of each of Groups I-IV are directed to related different apparatus:

embodiment of claims 1-3 with a second raw material gas supply unit for supplying an oxide

compound gas; embodiment of claims 4-11 with a third raw material gas supply unit for

supplying a third raw material gas excited by discharge and generated excited light;

embodiment of claims 12-16 with first and third raw material gas supply units and a

photocatalytic material provided on a dielectric; embodiment of claims 17-23 with first,

second and third raw material gas supply units and a photocatalytic material provided on a

dielectric.

Page 3

3. Because these inventions are independent or distinct for the reasons given above

and there would be a serious burden on the examiner if restriction is not required because

the inventions have acquired a separate status in the art due to their recognized divergent

subject matter, restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct

species: the oxide compound of the second raw material gas in Group I; the second and

third raw material gases in Group II; the third raw material gas in Group III; and the

second and third raw material gases in Group IV. The species are independent or distinct

because they are mutually exclusive.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for

prosecution on the merits to which the claims shall be restricted if no generic claim is

finally held to be allowable. Currently, claims 1, 4, 12 and 17 are generic.

Applicant is advised that a reply to this requirement must include an identification

of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is

allowable or that all claims are generic is considered nonresponsive unless accompanied by

an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of

claims to additional species which depend from or otherwise require all the limitations of

an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected

Application/Control Number: 10/758,648 Page 5

Art Unit: 1753

invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a

request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kishor Mayekar whose telephone number is (571) 272-

1339. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nam Nguyen can be reached on (571) 272-1342. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
